Goodge Street from outside number 64 to outside number 45– Carriageway resurfacing.

I write to inform you that the Council's contractor Conway will shortly be carrying out works to the carriageway in Goodge St as part of Camden's ongoing improvement programme. These works are scheduled to commence on 21 September 2026 and are expected to be completed by 22 September 2026. The works will be carried out on weekdays between the hours of 8.00 am and 6.00 pm.

In order to carry out these works it will be necessary to close Goodge St between the above locations and traffic diversions will be in place.

Notices giving details of dates and times of any parking bay suspensions will be fixed to posts and street lighting columns. It is essential that you do not park in any areas where parking has been suspended. Any vehicles left in a prohibited area, or otherwise illegally parked, may be removed by the Council's enforcement contractor or by the police. Please check the parking notices on a regular basis as changes to the works programme are sometimes unavoidable, necessitating changes to dates and times of parking bay suspensions.

Any vehicles that are removed will be taken to the Council's vehicle compound at Regis Road in Kentish Town, from where they may be retrieved on payment of a penalty charge. The compound may be contacted on 020 7974 4797. The nearest London Underground station is Kentish Town; buses 88, 134, and 214 stop near the station. (In some cases, vehicles may be moved to an adjoining street; if so, details of the exact location will be given on application to the vehicle compound and on payment of the penalty charge).

If you are proposing or have commissioned any utility company to undertake works at your property in the near future or have any enquiries or wish to discuss any aspect of the proposed works, please contact me on the direct line number given above.

Yours faithfully,

Tekeste Yeshitila
